

crushing the cost of waste disposal

Ag-mac V200 Multi Chamber Waste Baler

Each chamber has its own hydraulic bale ejection system for easy removal of bales onto a pallet. On each chamber there are four tying points to secure each bale with bale strapping. Top loading of material into each chamber is an easy way to load waste into the baler. Improved maintenance and servicing cost compared to having a number of single chamber vertical balers onsite.

Multi Chamber Baler Benefits:

- Saves time: one chamber can be loaded while the other is busy compacting
- Provides an efficient way of separating different materials for recycling
- Enables high volumes of waste to be processed in locations where height is restricted

Key Features

- Safe and simple to use; bales tied with soft polyester strapping
- Roller-guided compaction head for ease of movement between chambers
- Auto bale eject system, dispenses bale onto pallet
- Additional chambers – up to six in total - can be specified
- 12-month manufacturer's warranty

V200 Multi Specification

Press force (max)	16 tonne
Loading aperture (HxW)	1074 x 800mm
Bale weight (maximum)	200kg
Bale dimensions (HxWxD)	1000 x 1000 x 800mm
Number of ties per bale	6
Cycle time	35 seconds
Noise level	68 decibels
Machine weight	1400kg
Power supply	2.2kW 16A 220-240V
Dimensions (HxWxD)	2506 x 3260 x 1270mm
